

HOW THINGS WORK @ THE CSU

Understanding the New Electrical Safety Guidelines

A live, interactive webcast for SETC employees, others who work on or near energized equipment and those responsible for campus safety

Presented by
CSU/SETCU Joint Health and Safety Committee and
Office of the Vice Chancellor for Human Resources

October 29, 2008
10:30 AM–11:30 AM

Is this webcast for you? See if you can answer these questions.

- * What is the NFPA 70E Electrical Safety Standard?
- * What type of electrical safety training does your staff need?
- * How often should personal protective equipment be tested?
- * What are the 11 elements of a Lockout/Tagout program?
- * Do you know what kind of personal protective equipment is needed for various electrical tasks?
- * What do you know about contractors and electrical safety?

From this webcast, you'll learn:

- * What you need to know about the NFPA 70E Electrical Safety Standard, how to apply it, where to start
- * What program you need to teach this training
- * Job safety analysis and what it entails
- * Aspects of an ARC Flash
- * The 11 elements of a Lockout/Tagout program
- * Energized work permit procedures
- * How to identify some of the required electrical safety labels
- * Where to find electrical products and services
- * What campuses are doing with their electrical safety programs

**Electrical Safety
is a hot topic of
discussion on many
campuses. Don't miss
this unique training
opportunity, as we raise
campus awareness
and promote the
development of effective
safety programs.**

What is the reservation deadline?

The deadline for reservations is October 22, 2008 (or until all 100 spaces are reserved)

Questions?

Technology or seminar format:

Lynne Hellmer, Senior Director, or Jennifer Wicks, Executive Producer, Systemwide Professional Development at 888-200-4499 (toll free without voicemail).

Content:

Benjamin Elisondo, Manager of Operations, Safety, and Training; Facilities, CSU, Northridge, at 818-677-5556.

Presented by

Benjamin Elisondo, Jr.

Manager of Operations, Safety, and Training

Facilities Department

CSU Northridge

Who Should attend?

This overview course is for SETC employees, others who work on or near energized equipment and those responsible for campus safety. It is not intended to replace Electrical Safety Programs already in place on campuses. This training is intended to inspire individuals to further look into the requirements so they can be implemented on their respective campuses, based on their individual campus utility infrastructure.

Where will this course be held?

You'll attend at your desk on your computer wearing a headset or listening to audio speakers, or in a group setting. You will *not* need a telephone.

How many spaces are available?

Due to bandwidth restrictions, we must limit the number of connections. This webcast will be very interactive and if viewed in a group setting will require one person to interact with the presenters on behalf of the group.

What about technical requirements?

Easy! You'll need high-speed web access (you already have it at work) and an audio device like headphones or speakers. If your reservation is confirmed, we'll send you a web link so you can check your computer compatibility.

Thomas Robert Fredette

Electrician, Facilities Department

CSU Northridge
